# INFRARED HEATER CASE STUDY

SEASON 2020

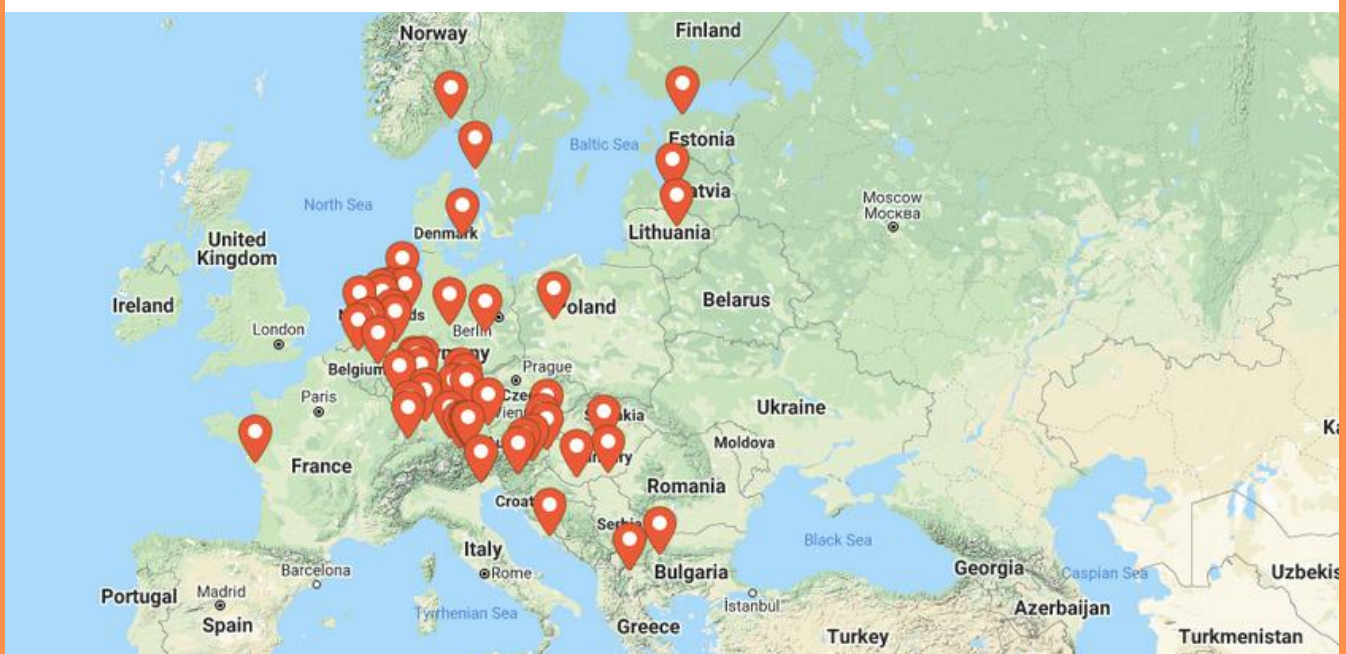

*A letter from the  
Sundirect team*

# TO ALL OUR PARTNERS

It has been 8 years since the first Sundirect infrared heater was introduced to the market. 8 years ago, Sundirect was a small company full of passion and dreams of changing the heating industry. Now, Sundirect has become one of the leading infrared heating brands in the market. In the past 8 years, we delivered a total of half a million pieces of infrared heaters globally. With every innovation we have made in the past 8 years, we have been changing this industry. And we are glad to see infrared technology becoming a more and more popular heating solution.

However, without the support from our great partners, we would never have been able to have any success. We would like to take this opportunity to say Thank You to all our friends and partners who helped Sundirect grow and let's aim to work together for a better future.

From Your Sundirect Team!
